FOR COOKING

FIREWOOD & KINDLING FOR COOKING

COOKING LOGS
EVERYDAY BAG

LOGS FOR COOKING	PLASTIC EVERYDAY BAG	CARDBOARD EVERYDAY+ BOX
TIMBER SPECIES	Barkless birch	
VOLUME, LITERS	22	30
LENGTH OF THE PIECES, CM	24-26	
NUMBER OF BAGS PER PALLET	64	56
NUMBER OF PALLETS PER 45'CTR	52	
DIMENSION OF PALLETS (W×L×H), CM	100×115×115	100×115×125

A must have product for professionals and all aspiring chefs for wood fired cooking. These bags feature large sized birch logs debarked giving minerals and debris free clean cooking. Burning dirty bark may affect food taste and smell so we produce bark-free birch logs that eliminate these unwanted side-effects.

KINDLING FOR COOKING	CARDBOARD SMALL BOX
TIMBER SPECIES	Barkless birch
VOLUME, LITERS	10
LENGTH OF THE PIECES, CM	12-13
NUMBER OF BOXES PER PALLET	160
NUMBER OF PALLETS PER 45'CTR	52
DIMENSION OF PALLETS (W×L×H), CM	100×115×125

Barkless kindling is by far the best option when cooking with firewood. Not only will the barkless firewood mean minerals and debris free food, it will also be safer for the environment due to all the timber being kiln dried to under 20% moisture content.

Kiln dried well below 20% MC in the core of the piece so ready to burn. Produced out of raw material from sustainably managed forests.

GARDEN FIRE LOG

Create a warm and welcoming atmosphere in your garden with this natural fire log. Once lit, it provides gentle heat to take the chill off cooler evenings while adding a beautiful glow that makes outdoor moments feel extra special.

Perfect for family gatherings, garden parties or quiet evenings under the stars, the fire log can become part of a simple outdoor tradition – light it, gather around and enjoy time together. The heat may also help discourage mosquitoes from lingering nearby.

REINDEERS

Bring a little Christmas magic into your home with this sustainable wooden reindeer, made from kiln-dried hardwood and suitable for indoor or outdoor use. Delivered semi-assembled in a cardboard box, putting it together can become a joyful pre-Christmas family ritual – a simple moment of togetherness that children and adults can look forward to every year.

Place your reindeer beside the Christmas tree as its festive guardian, by the front door to welcome guests, or make it part of your family's own Christmas story.

At the end of its life, the timber parts can be used as fuel in a stove or fireplace, while plastic parts and LED lights should be recycled responsibly.

Kiln dried well below 20% MC in the core of the piece so ready to burn. Produced out of raw material from sustainably managed forests.

WHO WE ARE

THREE DECADES OF LATVIAN TIMBER

We are a manufacturer of ultimate quality winter fuels based in Latvia with 3 decades of experience in producing sustainably sourced top quality timber products. With a zero-waste production policy, we marry quality products with a process that is kind to the environment.

We operate a 110'000 m² manufacturing hub in Latvia which includes full cycle production including saw milling, firewood/kindling/briquette production and 18'000 m² warehouse, where the ready products are accumulated for the season. In addition, we operate our own warehouse of more than 9'600 m² in the United Kingdom, holding stock close to our customers. This allows us to supply British retailers with short, reliable lead times and to respond quickly to seasonal demand. By using state-of-the-art processes and historical knowledge, the consistency and quality of our products have been refined and perfected since we were established back in 1996.
